

EDNA TOWNSHIP MEETING **July 7, 2018** **www.ednatownship.org**

A special meeting was held on July 7, 2018 to discuss the road elevation of the Little McDonald projects. Dennis Sazama, Bill Norris, Carol Nelson and Echo Dockter were present.

The guest sign in sheet is attached.

Note that Jeff Stabnow, the Edna engineer for this project, and Justin Rodeman, from Mark's Sand and Gravel, were also present.

Some of the points discussed included:

- a) the road will be crowned. Half of the water will run towards the lake, half will run toward the sloughs
- b) the asphalt surface will be 22 ft wide.
- c) the shoulders will be 2 ft wide.
- d) the shoulder will slope
- e) the ditches will be changed to allow water to run towards the castle house slough
- f) black dirt will be provided for the ditches
- g) aprons for the approaches are included in the project. The Board has agreed to include work on the approaches, not to exceed the road-right-of-way
- h) the hard crust and compacted gravel will be covered with no more than 3" of aggregate before the asphalt is put down
- i) the completion date is no later than October 15. The longer the project can wait the more likely that all the heavy equipment will be done moving over these roads.
- j) the lake level lowering project dates are slipping back a little. They are planning a test in August and should be pumping by October.

All parties were allowed to speak.

All were reminded of the regular township meetings, held on the 3rd Tuesday of each month at the Dent Community Center (the old elementary school) at 8 pm.

Meeting adjourned.
